

BAGUS WIRANTO WICAKSONO

Full-Stack Developer & AI Automation Engineer

baguswirantowicaksono@gmail.com | +81 70-8402-3941 | Ogawara, Miyagi, Japan | linkedin.com/in/baguswiranto | github.com/baguswiranto | baguswiranto.github.io

PROFESSIONAL SUMMARY

AI-focused full-stack developer and product builder based in Japan. Founder of 8Agents — a production multi-agent SaaS platform with 15+ autonomous AI agents, and RakuSaku — a digital services marketplace. Proven track record shipping full-stack applications with Next.js, Python/FastAPI, Docker, and AI automation.

WORK EXPERIENCE

Founder & Full-Stack Developer

2024 — Present

8Agents · Remote / Japan

- Built and deployed a production multi-agent SaaS platform with 15+ autonomous AI agents accessible via Telegram, handling the entire stack from auth to payment gateway
- Architected multi-provider AI gateway supporting 10+ LLM providers with automatic failover and rate limiting
- Designed and deployed a complete admin dashboard with user management, subscription tracking, and usage analytics
- Led infrastructure setup including Docker, PostgreSQL, Nginx, and CI/CD with zero-downtime deployments

Founder & Full-Stack Developer

2025 — Present

RakuSaku · Remote / Japan

- Built a digital services marketplace for game top-ups and vouchers with full payment flow and order management
- Developed admin dashboard with real-time analytics, order tracking, and customer management
- Integrated supplier API for automated order fulfillment and inventory management
- Implemented responsive frontend with Next.js and secure authentication system
